
QuantumCast Documentation

Release 1.3.6-7-g87e83e7

QuantumCast

Aug 22, 2023

CONTENTS

1	Getting Started on QuantumCast	3
2	Documentation for Developer	5
3	Documentation for Cloud Operators	7
4	About QuantumCast	9

Find user guides, technical spec, developer guides and API references.

The Platform is a large bundle of cloud-based audio services. Based on a standard orchestration, you can combine QuantumCast to your own individual audio cloud system with your own workflows.

If you need experts to assist you, than join to our Slack <<https://quantumcastworkspace.slack.com/>> or Helpdesk <<https://streamabc.zammad.com>>.

ABOUT QUANTUMCAST

4.1 Support & Helpdesk

For Support and individual help please open a ticket:

4.1.1 What do we need to be able to reproduce a problem.

If possible:

- description of the problem
- exact time of the problem
- affected StreamURL and channelkey
- Is the problem always visible or only at one moment in time?
- Does the problem show up in an external software and have error sources already been excluded there?
- information about the client (name, type and year of construction, etc.)
- public IP address with which you are visible to the outside world and which we can find in our log
- a recording perhaps with a smartphone where the problem can be heard and the interaction seen

4.2 Copyright
